

Arnot Health
Job Description

JOB TITLE: Rheumatology

DEPARTMENT: AMS Administration

REPORTS TO: Director of Medical Specialties

OVERVIEW OF POSITION:

Responsible for the overall delivery and coordination of Rheumatology services to patients under physician's care including overseeing quality. Provides medical care in accordance with prevailing accepted medical standards, the rules and regulations of the American Hospital Association, and national accrediting organizations, and pertinent federal and state laws. Complies with all policies, bylaws, rules, regulations, and manuals of the Medical Staff of the Hospital and PLLC. Complies with attendance standards for essential professional activities. Prepares and maintains medical records according to group policy and procedure. Renders high-quality, efficient medical services in compliance with third party payor contract requirements. Provides patient, employee, and community education programs when warranted. Performs other related duties as assigned/requested by the President, Medical Director or other senior administrative staff.

MAJOR RESPONSIBILITIES:

1. Physician shall provide Rheumatology services to Hospital patients, including but not limited to those services provided at out-patient office (Office) locations, as follows;
 - (a) Scheduling hours necessary at the Office to sustain an active full-time Rheumatology practice;
 - (b) Providing in-patient care to hospitalized patients, as applicable and not until after 3-6 months;
 - (c) This bullet is removed.
 - (d) Participating equitably in the on-call schedule for Physician's office and hospitalized patients and the Emergency Department at any in-patient facility where Physician holds staff privileges or as otherwise stipulated; and

2. To the degree medically necessary and applicable, Physician shall skillfully perform and document those duties customarily performed by a physician for the Hospital which shall include, but not be limited to:
 - (a) History taking, and appropriate physical examination.

- (b) Formulation of differential diagnoses.
- (c) Ordering of appropriate diagnostic tests.
- (d) Compliance with third party payor contract terms to which the Hospital is a party.
- (e) Prescription of medication, and/or procedures as is medically appropriate.
- (f) Follow-up care as is medically appropriate.
- (g) Maintenance of appropriate, legible, and timely written patient records, which shall at all times be suitable for use by successor physicians, and strict adherence to Hospital's policies regarding the custody of patient charts.
- (h) Supervision of individuals who participate in the care of patients or the rendering of services to patients for the purpose of providing high quality patient care.
- (i) Participation in professional education programs which will maintain and advance professional and staff patient-care skills and programs which will educate patients and their families.
- (j) Participation in activities directed towards improving the professional care rendered by Physician and the Hospital, including such peer review and other programs as the Hospital shall designate.
- (k) Provision of input and advice to Hospital in the development of policies, procedures and programs, both current and new, for medical care at Hospital in the community;
- (l) Provision of advice to Hospital on the acquisition of equipment and other technology which will improve the medical diagnosis and treatment of patients; and
- (m) Provision of care to indigent patients in accordance with the Hospital's policies.

OTHER:
